

8 TEACHING MOVES TO TRANSFORM YOUR MATH CLASSROOM

Do you want to increase student engagement in your math classroom? Do you want your students to have more perseverance in their problem-solving? Do you want the learning experiences in math class to be more meaningful? Do you want your math class to be more enjoyable (for you AND your students)?

In this workshop, you will set a vision for your mathematics classroom, and you will learn about NCTM's 8 Math Teaching Practices that will help you work toward that vision. Join us as we explore how to:

- implement problem-solving tasks in a way that sparks and grows student perseverance
- deepen student understanding by using pictures and manipulatives
- facilitate meaningful mathematical conversations by posing the right questions at the right time
- empower student learners by including them in classroom conversations about math goals and assessments

Janet Moore is passionate about encouraging students to be curious, inspiring them to explore, and empowering them to experience success in mathematics and science. After teaching mathematics at Bureau Valley High School, Janet Moore became Lead Flight Director of the Challenger Learning Center in Bloomington, Illinois where she led students on simulated space missions, developed STEM curriculum materials, and provided professional development for teachers.
