

ENGAGING STRUGGLING STUDENTS

What do educators need?

DOES THIS CROW REMIND YOU OF SOME STUDENTS? Stuck? Curious? Dumbfounded? Playful? Resistant?

Take away powerful ways to support your struggling students via sustainable, active engagement strategies. Come prepared for a thoughtful, highly interactive, and collaborative virtual session. As we unpack three essential elements of active engagement, you will gain insights: sensory-driven empathy mapping, purpose-guided creative problem-solving, and the transfer of new understandings into other situations and domains. This session will be part facilitator-led, part workshop, and part applied learning sciences.

Empathy Mapping

Our sensory inputs guide us through new learning experiences and help us retain, recall, and apply what we know through our environment, cognition, and emotions.

Mapping the significant inputs helps to understand the student's learning barriers and reveal why, how, and with what they are struggling.

It is essential to identify the influences that triggered their visible reactions, responses, changes in behavior, decisions, and actions.

**All Educators
Are Welcome!**

**October 1, 2024
3:30 - 5:00 pm CDT
Live on Zoom &
Asynchronously for
60 days
1.5 PD Hours**

Creative Problem Solving

The creative problem-solving process is framed by the context of a purposeful problem set, essential question, and intended outcome.

Contextual references serve as relevant anchors for learners to generate purpose, understanding & meaning, memory, recall, and transfer of big ideas & concepts.

Learning experiences are guided via learning targets, assessment criteria, and evidence of progress.

Facilitated by Doris Wells-Papanek

As Founder and Director of the Design Learning Network, Doris collaborates with diverse partners around the globe. Using a creative problem-solving approach, she co-constructs shared visions, tackles complex challenges, and strives for positive impact. Doris is the co-author of five student-centered publications. She holds a master's in Curriculum and Instruction Design from National Louis University and a bachelor's in Product and Environmental Design from the Kansas City Art Institute.

Transfer of Learning

Actively engaged students are better prepared to understand deeply enough to transfer what they have learned into new undertakings.

Learners become more adept at linking visual and textual connections, sorting, grouping, organizing their thoughts, and preparing for productive interactions with others.

They become more respectful, manage their emotions, and confident when exchanging critical feedback.

Takeaways include learning strategies, contextual frameworks and associated learning sciences from which to build.

Organization/School

Address: _____ City: _____

State: _____ Zip: _____ Phone: _____ Fax: _____

Name/Position: _____

Email: _____

IL ASCD Membership # _____ IEIN # _____

If you need to add more names, please duplicate this registration form.

IL ASCD member Each	1 Person Each	2 People Each	3 People Each	Student/ Retiree Each
