

OH! THE MATH THEY NEED TO KNOW!

Ensuring Pre- K & Kindergarten Students
Receive Engaging and Age Appropriate
Games and Activities

Oh the Math... we know student success in mathematics starts right when our Pre K's and K's first enter school. Attitudes toward math including curiosity, develop quickly and are shaped by the teachers that plan and teach the necessary concepts that lay the foundation for elementary math. A year of interrupted learning has meant that many of our young students have missed a whole year of play and learning math.

Jane Felling is the author of the award winning Box Cars and One-Eyed Jacks series and has been a leader in the area of games as a teaching strategy for over 30 years. She is passionate about helping teachers with implementing engaging and effective teaching strategies and is known for her high energy presentation style.

Come prepared to play author Jane Felling's favorite games and learn strategies and best practices for the following concepts: subitizing, counting, comparing numbers, number concepts including odd/even, doubles, make 5, make 10, number line count on and back, simple graphs. Whole movement activities tied to the math, math talks, music integration that provide "brain breaks" will all be shared throughout the session. Activities are suitable for whole class or center/partner based instruction. Handouts will include favorite games, concept skill checklists for assessment, and ideas that can be implemented right away.

ALL PARTICIPANTS NEED TO BRING A DECK OF CARDS, 8 REGULAR DICE AND A SET OF DOMINOES.

This session will be of benefit to any Pre K, Kindergarten and First Grade teachers that need ideas for rebuilding basic concepts.

Need to get the learners engaged now that we are back in the classroom? Attend to learn how!
